CM LASER SOLUTIONS

Mission

“ Our mission is to deliver exceptional laser cutting and engraving services that exceed customer expectations. We strive to continuously innovate and invest in the latest technology to provide cutting-edge solutions for our clients.”

Vision

“To be the premier provider of laser cutting, CNC cutting and engraving services, known for our quality, precision, and customer-centric approach.”

People

CM LASER

Founded in 2009 in Piliyandala, Sri Lanka, CM Laser Solutions is a pioneering service provider for laser cutting, engraving and CNC cutting services.

With over 20 years of experience in laser and CNC Technology, our chartered electrical engineer owner leads a team of 07 dedicated technicians. We are committed to delivering innovative solutions that exceed customer expectations

We are housed in a 6000 sqft specifically designed building for laser and CNC works with ample parking space close to Piliyandala- Katubedda main road.

- CO₂ laser cutting and engraving : 13 heads with different bed sizes and focus lengths
- Fiber Laser Metal Cutter : 1500W (Mild steel upto 12mm, SS upto 6mm)
- Laser head focus lengths : 38.1 mm, 50 mm, 56mm, 63 mm, 100mm
- Fiber laser engraving machine : 30W and 50W
- CNC routers : 04 nos of routers with 8x4 bed size
- Acrylic sheets and Sheet metal bending
- Automated 3D letter bending

Facility and capability.

CM LASER

CO₂ Laser Cutting

CM LASER

Plastic / PVC/ Acrylic/ Ply wood/ Eco boards /
Card boards / foam boards

Key tags, Cake toppers, 3D models, name boards

Wall panels, electronic enclosures,

Can cut up to 12 mm Acrylic

**Many machines with different specifications for
better quality on different materials**

Shorter lead time

CO₂ Laser Cutting – Fabrics / Appliques

CM LASER

Precision cutting for full garments, Appliques, Zipper opens, etc.

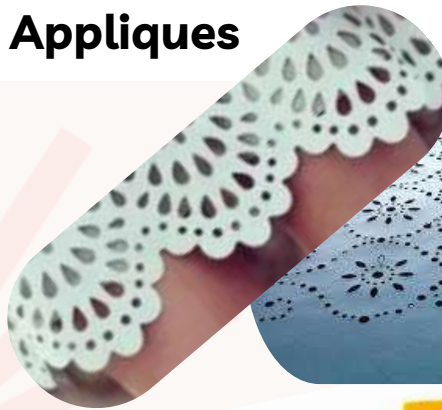

cutting with glue tapes for bonded garments

Precision cutting for Appliques

Special methods for Low burn marks

Improved handling

Shorter lead time

CO₂ Laser Engraving

Precision engraving on Glass, anodized metals, ply wood, PVC, wood etc..

Special laser heads with different focus lengths for quality engraving

Rotary engraving facility for curved surfaces

Shorter lead time

Fiber Laser Cutting

CM LASER

Precision cutting – 0.02 mm accuracy

Can cut on SS – upto 6mm,
Brass- upto 5mm,
Mild Steel – upto 12mm,
Aluminum – upto 6mm

Can cut without removing the
protecting film

Fiber Laser Engraving

CM LASER

Precision engraving

Can engrave on SS, Brass, PVC,
Plastic, Aluminum etc

Rotary engraving facility for curved
surfaces

Shorter lead time

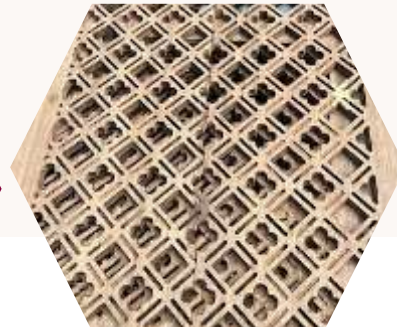

CNC Cutting

CM LASER

Wood / Plastic / PVC/ Acrylic/ Ply
wood/ Eco boards /
MDF/ HDF/ Cladding/

Door panels, pantry cupboards,
wall panels, out door advertising,
name boards, etc..

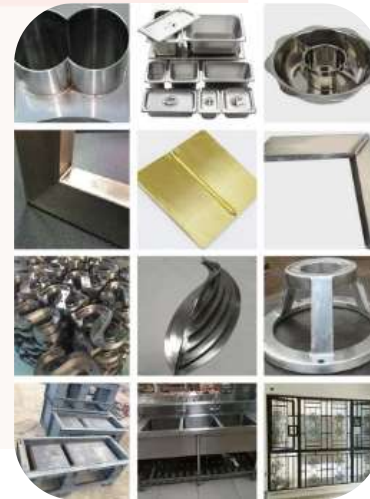

Laser welding and Spot welding

CM LASER

High quality welding on MS, SS, Al, Brass with
less heat affected zones

Spot welding upto 4mm Sheet metal

3D letter bending

CM LASER

Automatic Al foil bending for 3D sign boards
Channel letter Bending
(30 mm, 60mm and 100mm with different colors)

Customer feedbacks

CM LASER

★★★★★ 7 months ago

Professional and passionate. All laser engraving and cutting including metal. Highly recommended

★★★★★ 2 years ago

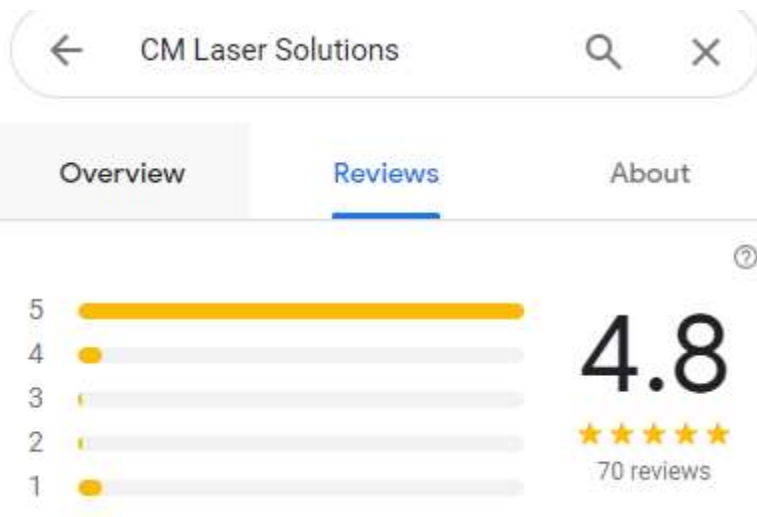

Five star service. He is no lazy to do any works. Very kind staffs and wonderful service. You can do all kind of laser cuttings needs here. Highly recommend.

★★★★★ 4 years ago

Awesome location and great service. They have a really good collection of laser and plasma cutting & engraving machines that are of next level in quality. Can be ordered from anywhere in the country through mail, which is a really convenient option. Offers a friendly and quick service.

★★★★★ 4 years ago

I got my work done with superior quality and the price is unbelievable low,
Lot of technical inputs were given and i could improve my project with their engineering input.
They have all the facility to laser cutting, laser **engraving** on any materials, plasma cutting and more..
good work and keep it up!!!
